

Mazuri® Monkey Crunch 20 Biscuit

(Available at www.mazuri.com or through a Mazuri® retailer)

Formula code – 5M29

Description

Mazuri® Monkey Crunch 20 Biscuit is a highly palatable, crunchy treat formulated for dietary enrichment. It is nutritionally balanced to ensure that the primates are receiving all of the necessary nutritional components.

Features and Benefits

- **Very high palatability** - Animals readily consume the product.
- **Crisp, crunchy texture** - A texture preferred by many animals.
- **Complete diet** - Supplementation with vitamins and minerals is not necessary.

Product Form

- Extruded feed: 1" diameter x 1 ½" length biscuit
- 20 lb. net weight paper sack

Catalog

0001476

Guaranteed Analysis

Crude protein not less than 20.0%
Crude fat not less than 5.0%
Crude fiber not more than 2.5%
Moisture not more than 12.0%
Ash not more than 8.0%

Ingredients

Ground corn, dehulled soybean meal, whole wheat, sucrose, wheat germ, dried egg product, soybean oil, calcium carbonate, flaxseed, brewers dried yeast, dicalcium phosphate, salt, l-ascorbyl-2-polyphosphate (stabilized vitamin C), dl-methionine, pyridoxine hydrochloride, choline chloride, folic acid, cholecalciferol (form of vitamin D₃), vitamin A acetate, biotin, calcium pantothenate, menadione sodium bisulfite complex (source of vitamin E), d-alpha tocopheryl acetate (form of vitamin E), preserved with mixed tocopherols (form of vitamin E), thiamine mononitrate, rosemary extract, ferrous sulfate, vitamin B₁₂ supplement, nicotinic acid, citric acid, riboflavin supplement, zinc oxide, manganous oxide, ferrous carbonate, copper sulfate, zinc sulfate, calcium iodate, cobalt carbonate, sodium selenite.

Feeding Directions

- Mazuri® Monkey Crunch 20 Biscuit is designed to be an essential part of a total primate feeding system and may be used in conjunction with all other Mazuri® primate products.
- Primates generally consume about 2% to 4% of their body weight in food each day on a dry matter basis (i.e., a 50 kg animal will eat 1 to 2 kg of food per day, on a dry matter basis).
 - Mazuri® Monkey Crunch 20 Biscuit can be supplemented with fresh vegetables and fruit if this is desired to provide variety in the diet, as long as the dry matter of these items does not exceed 50% of the dry matter consumption. Using typical produce and browse, a feeding program on an "as fed" basis would consist of 60% produce/browse and 40% Mazuri® primate products (i.e., a diet may be 6 lb. of produce/browse plus 4 lb. of one or a mix of Mazuri® primate products).
- The amount of diet the animal requires will vary according to its age, size, life stage, health status and activity of the animal and the environmental temperature.
 - Adjust daily feed intake based on the health status, body condition and nutrient level desired to meet the needs of your primates.
 - Diet may be soaked to soften the biscuits for infants or animals that have difficulty chewing.
- Fresh, clean water should be available at all times.
- Primates require ascorbic acid (vitamin C) in their daily diet. Mazuri® Primate Diets contain a stabilized form of vitamin C that is stable under appropriate storage conditions for at least 1 year from the date of manufacturing printed on the bag.

Vitamin E, IU/kg.....	145
Vitamin K (as menadione), ppm.....	2.9

Storage Conditions

For best results, store contents of open bag in container with sealing lid. Store in a cool (75°F or colder), dry (approximately 50% RH) location. Freezing will not harm the diet and may extend freshness. Use within 1 year of bag manufacturing

¹ Based on the latest ingredient analysis information. Since nutrient composition of ingredients varies, analyses will vary accordingly.

² Calculated from NRC of Non-Human Primates, (2nd ed., 2003).

* Naturally occurring sugars not included in calculation.
