

GROWTH

TEXTURED

50 LBS
(22.7 KG)

IDEAL FOR:

Weanlings, yearlings, broodmares, breeding stallions

FEATURES:

High fat & fiber, extended amino acid profile

HELPS SUPPORT:

Consistent growth, hay shortages, poor hay quality

Triple Crown Growth is fortified to provide young horses, broodmares and breeding stallions more calories through high quality fiber sources, like beet pulp, along with high fat to reduce the need for elevated levels of carbohydrates. This provides a more consistent rate of growth to help alleviate joint problems in growing horses.

FEEDING DIRECTIONS

NURSING FOALS

Up to 400 lb.

Up to 4 lb. per day

WEANLINGS

500 - 600 lb.

5 - 6 lb. per day

1. One cellulase unit (CU) is defined as the amount of activity that will produce a relative fluidity change of 1 (determined with a calibrated viscometer) in 5 minutes in a defined carboxymethylcellulose substrate at pH 4.5 and 40°C.

2. One hemoglobin unit (HUT) of proteolytic (protease) activity is defined as that amount of enzyme that produces, in one minute under the specified conditions, a hydrolysate whose absorbance at 275nm is the same as that of a solution containing 1.10g per mL of tyrosine in 0.006N hydrochloric acid.
